

CE CLASS III
INJECTABLES
TRUSTED SINCE 2004

50+ COUNTRIES

Introducing the MesoMedica PRIME line, a CE Class III mesotherapy line of injectables manufactured in Spain according to the highest European quality standards (ISO 13485).

For nearly 20 years MesoMedica has been hailed as the leading aesthetic mesotherapy brand on the market and is trusted by thousands of medical practitioners worldwide.

With its ready-to-use cocktail formulations specifically tailored for the modern injector the new PRIME line is the perfect addition to any aesthetics practice.

PRIMAGE | 5 x 5mL

Dermal implant containing a non-cross-linked Hyaluronic Acid solubilized in a protective buffer, indicated for treatment of photo ageing and its consequences and other skin or subcutaneous diseases (i.e. striae distensae).

Ingredients: HA, Rosmarinus EG, Methylsilanol mannuronate, Zinc Gl, Cobalt Gl, Vit B1, Vit B6, Leucin, Arginine Asp, Sodium Ascorbyl Phosphate (Vit C), Glycine, Proline, Ferulic, Resveratrox, Vit F

PRIMEHAIR | 5 x 5mL

Dermal filler, containing a non-cross-linked Hyaluronic Acid solubilized in a protective buffer. The restructuring and moisturizing capacity of Hyaluronic Acid supplies the scalp with exceptional hydration.

Ingredients: HA, Biotin, Pantenol, Ginkgo EF, CG b-FGF, DNA LMW

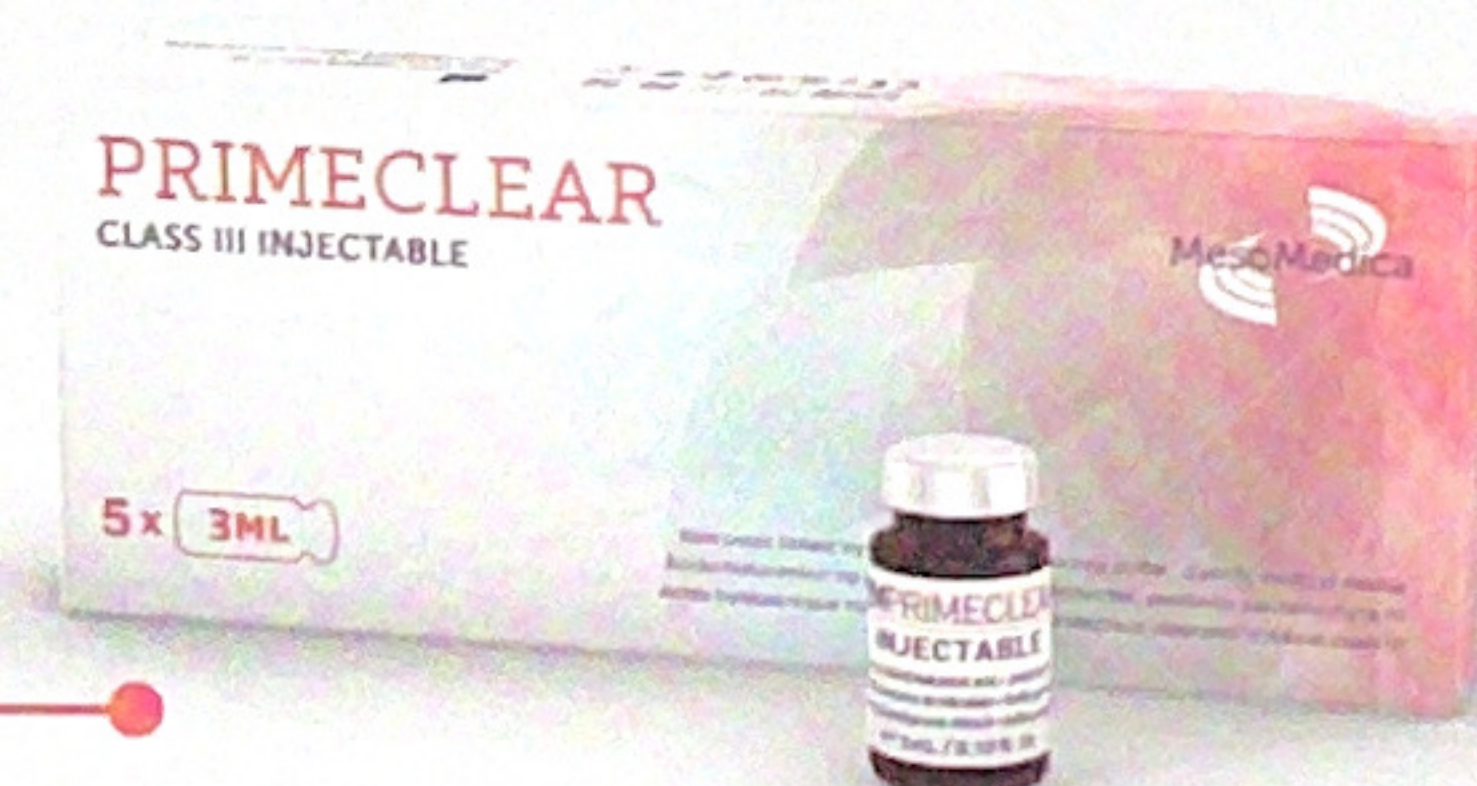

PRIMEYES | 5 x 3mL

Dermal implant for treatment of skin photo ageing and its consequences or skin atrophy especially of the area around the eyes.

Ingredients: HA, Sodium Ascorbyl Phosphate (Vit C), Troxerutin, Coumarin, Resveratrol, Ginkgo EF

PRIMECLEAR | 5 x 3mL

Dermal implant containing a non-cross-linked Hyaluronic Acid solubilized in a protective buffer. It is a product specially formulated for sun damaged skins, since the filling effect of Hyaluronic Acid is assisted by the skin whitening modulating action, treating in the same time several photo ageing aftermaths.

Ingredients: HA, Retinyl Palmitate, Vit E, Pantenol, Arbutin, Morera EG, Glycyrrhiza Glabra EF, Sodium Ascorbyl Phosphate (Vit C)

PRIMESLIM | 5 x 10mL

Dermal implant for filling dermal irregularities, associated with a protective buffer specifically formulated for Edematous fibrosclerotic panniculopathy.

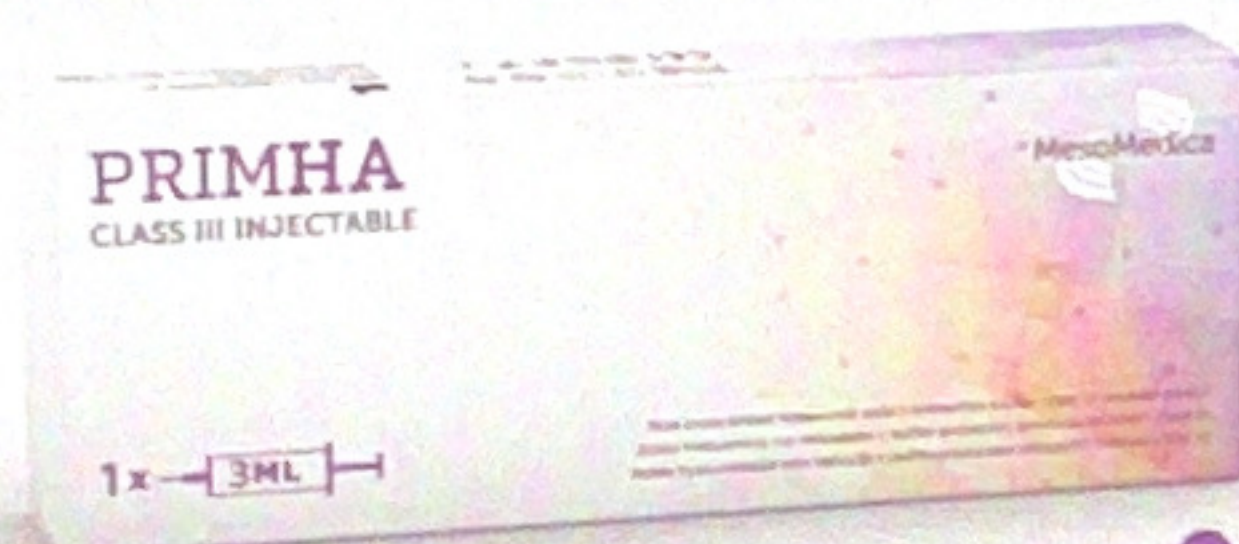

Ingredients: HA, Ginkgo EF, Hedera Helix EG, Cynara EF, Fucus EG, Ruscus EG, Troxerutin, Caffeine, Legactif

PRIMESTRETCH | 5 x 10mL

Dermal implant of non-cross-linked hyaluronic acid for the treatment of stretch marks, to fill the depressions caused by linear skin ruptures of stretch marks. The activity of the implant is sustained by the associated protective buffer which allows to regenerate the dermal matrix, atrophic depressions, and flaccidity of the dermis at the level of stretch marks.

Ingredients: HA, DNA LMW, CG-bFGF, Sodium Ascorbyl Phosphate (Vit C), Methylsilanol mannuronate, Leucine, Glycine, Lysine ClH, Proline

PRIMHA | 1 x 3mL (Non-crosslinked)

Dermal implant for treatment of skin photo aging and its consequences; treatment of dermal atrophy.

Ingredients: Hyaluronic Acid 15mg/mL
